System requirements

The general system requirements for xFlow 5.2.1 are described in the publication *xFlow System Requirements*.

This publication addresses only those system requirements that apply to the SAP NetWeaver Gateway server as well as to xFlow. The SAP NetWeaver Gateway server is required when xFlow is used in connection with SAP Fiori.

SAP system

Unicode support must be activated in the SAP system and in all systems that are used in connection with SAP Fiori.

For more information as to which versions are supported by SAP, see the SAPUI5 Versions Maintenance Status.

Component	Supported version
SAP Fiori front-end server	3.0 (see SAP OSS, Note 2355644)
SAPUI5	1.44
SAP NetWeaver Gateway server	7.51

xFlow release

If xFlow is used in connection with SAP Fiori for SAP ERP, the xFlow version in the SAP ERP system must be identical to that installed on the SAP NetWeaver Gateway server.

Component	Supported version
xFlow	5.2.1

Web client (desktop)

The recommended screen resolution for the xFlow Web is Full HD (1920 x 1080) or higher.

Component	Supported version
Web browser	Microsoft Internet Explorer 11

Web client (mobile end devices)

Mobile end devices such as tablets or smartphones must fulfill the HTML5 and CSS3 standard and be JavaScript-enabled.

For smartphones with small screens, use of the Web Client is restricted. As the xFlow Feeder and overviews such as the Invoice Overview involve large volumes of data, they can only be partially displayed.

Component	Supported version
iPhone/iPad operating system	iOS 11.0.0 or higher
SAP Fiori app	1.9.4 or higher
Web browser	Safari 10.3.3 or higher
