System requirements

The general system requirements for xFlow 5.2.2 are described in the *xFlow System Requirements* publication.

This publication only describes the additional system requirements that apply to the SAP NetWeaver Gateway Server. The SAP NetWeaver Gateway Server is required if xFlow is used in connection with SAP Fiori.

SAP system

Unicode support must be activated in the SAP system and in all systems that are used in connection with SAP Fiori.

For more information about the versions supported by SAP, see the SAPUI5 Versions Maintenance Status.

Component	Supported versions
SAP Fiori front-end server	3.0 (see SAP OSS, Note 2355644)
SAPUI5	1.44
SAP NetWeaver Gateway Server	7.51

xFlow release

If xFlow is used in connection with SAP Fiori for SAP ERP, the xFlow version in the SAP ERP system must be identical to the xFlow version installed on the SAP NetWeaver Gateway server.

Component	Supported versions
xFlow	5.2.2

Web client (desktop)

The recommended screen resolution for xFlow Web is Full HD (1920 x 1080) or higher.

The session storage (`Window.sessionStorage`) must be activated.

Component	Supported versions
Web browser	Microsoft Internet Explorer 11

Web client (mobile end devices)

Mobile end devices such as tablets or smartphones must fulfill the HTML5 and CSS3 standard and must be JavaScript-enabled.

The web browser must support the Web Storage API and the session storage (`Window.sessionStorage`) must be activated.

Limitations apply to smartphones with small displays. Due to the large amount of data, the Invoice Overview and similar overviews as well as the xFlow Feeder can only be displayed to a limited extent.

Component	Supported versions
iPhone/iPad operating system	iOS 11.0.0 or higher
SAP Fiori app	1.9.4 or higher
Web browser	Safari 10.3.3 or higher
