System requirements

The general system requirements for xSuite Cube 5.2.3 are described in the *xSuite Cube System Requirements* publication.

The system requirements described below apply in addition to the SAP NetWeaver Gateway Server. The SAP NetWeaver Gateway Server is required if xSuite Cube is used in connection with SAP Fiori.

SAP system

Unicode support must be activated in the SAP system and in all systems that are used in connection with SAP Fiori.

For more information about the versions supported by SAP, see the SAPUI5 Versions Maintenance Status.

Component	Supported versions
SAP Fiori front-end server	3.0 (see SAP OSS Note 2355644)
SAPUI5	1.44
SAP NetWeaver Gateway Server	7.51

xSuite Cube release

If xSuite Cube is used in connection with SAP Fiori for SAP ERP, the xSuite Cube version in the SAP ERP system must be identical to the xSuite Cube version installed on the SAP NetWeaver Gateway server.

Component	Supported versions
xSuite Cube	5.2.3

Web client (desktop)

The recommended screen resolution for xSuite Web Cube is Full HD (1920 x 1080) or higher.

The session storage (`Window.sessionStorage`) must be activated.

Component	Supported versions
Microsoft Internet Explorer	11
Google Chrome	78 or higher

Web client (mobile end devices)

Mobile end devices such as tablets or smartphones must fulfill the HTML5 and CSS3 standard and must be JavaScript-enabled.

The web browser must support the Web Storage API and the session storage (`Window.sessionStorage`) must be activated.

Limitations apply to smartphones with small displays. Due to the large amount of data, overviews such as the Invoice Overview as well as the xSuite Feeder can only be displayed to a limited extent.

Component	Supported versions
iPhone/iPad operating system	iOS 11.0.0 or higher
SAP Fiori app	1.9.4 or higher
Web browser	Safari 10.3.3 or higher
